Navitas To Present Next-Gen Semiconductors at Taiwan VIP Investor Meeting

Gallium nitride (GaN) power ICs to expand from mobile fast-charger market to higher-power consumer, EV, solar, and data centers.

Dublin, Ireland – September 14, 2021— Navitas Semiconductor (“the Company” or “Navitas”), the industry-leader in GaN power integrated circuits (“ICs”), has announced its participation in the Taiwan VIP Investor Meeting, hosted by Mesh Ventures. The virtual meeting is scheduled for September 16th at 10pm US EDT, September 17th at 10am in Taiwan.

Gallium nitride (GaN) is a next-generation semiconductor technology that runs up to 20x faster than legacy silicon and enables up to 3x more power and 3x faster charging in half the size and weight. Navitas’ GaNFast™ power ICs integrate GaN power and drive plus protection and control to deliver simple, small, fast and efficient performance. With over 130 patents issued or pending, and significant trade secrets including a proprietary process design kit (PDK), Navitas believes it has a multi-year lead in next-generation GaN power ICs.

Navitas’ co-founder and CEO, Gene SHERIDAN and Sr. VP Finance Todd GLICKMAN, will review GaNFast power IC technology and the \$13.1B market opportunity in a live presentation with Q&A. To participate, investors should [register online](#) via the Mesh Ventures website.

“This VIP Investor Meeting is an excellent opportunity for Taiwanese investors to access this next-generation GaN technology and interact with Navitas management in real-time,” said Edward CHYAU, Managing Partner at Mesh Ventures. “As an existing investor, we can speak from experience about how the Navitas team is dedicated to both company revenue growth and ensuring that customers benefit from this leading-edge, environmentally-beneficial technology.”

GaN power ICs have up to 10x lower CO₂ footprint than legacy silicon chips. The higher efficiency and smaller size of the end equipment mean that customers can accelerate progress on their own carbon net zero plans. As Navitas helps to “Electrify Our World™”, GaN is forecasted to address over 2.6 Gtons of CO₂ annually by 2050.

“Taiwan is an important focus for Navitas, with a strong manufacturing base for our GaN power IC wafers, test and package assembly, plus an established customer base,” said Gene Sheridan, Navitas’ co-founder and CEO. “This VIP meeting is an excellent chance to talk with members of the Taiwanese investment community to highlight our aggressive revenue ramp and expansion into new markets, such as consumer electronics and data centers. Overall, it’s a \$13 billion GaN electrification opportunity – and we are grateful to Mesh for this platform to meet with future-thinking investors.”

About Mesh Ventures

Mesh Ventures is a leading venture capital investor, based in Taipei, Taiwan, with a global ecosystem of cross-industry partners spanning corporations, industry leaders, subject matter experts, academia, financial institutions, and professional services.
